**Healthcare Coalitions.** Healthcare Coalitions support all healthcare organizations during emergency response and recovery. An element of this mission is promoting integration of Coalition member organizations into the broader response community. In Ohio, health care coalitions are a resource used among healthcare organizations to prepare for emergencies.

### **Local Emergency Planning Committees (LEPCs):**

Under the Emergency Planning and Community Right-to-Know Act (EPCRA), Local Emergency Planning Committees (LEPCs) must develop an emergency hazardous materials response plan, review the plan at least annually, and provide information about hazardous chemicals in the community to citizens. Plans are developed by LEPCs with stakeholder participation. There is one LEPC for each of the more than 3,000 designated local emergency planning districts across the nation.
