CRITICAL TRANSPORTATION

Provide transportation (including infrastructure access and accessible transportation services) for response priority objectives, including the evacuation of people and animals and the delivery of vital response personnel, equipment, and services into the affected areas.

MISSION AREA

Response

EXAMPLE WORDING

Buckeye County EMA has a comprehensive debris management plan that ensures coordinated and effective clearance of debris from affected routes to facilitate response operations.

FUNCTIONAL AREAS

- Airspace management
- Debris removal
- Delivery of response assets
- Establishing access
- Evacuation
- Reentering affected area
- Transportation safety and condition assessments

LOCAL PARTNERS

Local partners determine the safety and condition of roadways for responders and the public and, immediately following an incident, ensure clearance of thoroughways for responders.

Examples demonstrate options to consider and are provided for training purposes only. The examples are intended to demonstrate how planning teams may incorporate the key tasks found on FEMA’s Core Capability Development Sheets into planning documents (e.g. the Emergency Operations Plan, Mitigation Plan, Debris Management Plan, HazMat Plan, and so forth). The items in the Functional Areas section are FEMA-identified areas where gaps could exist for the associated core capability. Counties should not re-design their Emergency Operations Plans around the Core Capabilities; stakeholders should integrate the capabilities within the EOP and in a format that is effective for the jurisdiction.
